

5G EDGE COMPUTING INDUSTRIAL IOT CELLULAR ROUTER

Purpose-built for Industry 4.0, Digi IX40 supports the 5G connectivity and edge intelligence needed to enable numerous use cases ranging from predictive maintenance and asset monitoring to machine learning and advanced robotics. It seamlessly connects multiple machines, whether wired or wireless, in the most demanding environments, optimizing integration of cloud-delivered operational technology (OT) services with information technology (IT) to streamline complex operations and scale IT infrastructure.

With its all-in-one design, strong computing power and integrated memory, Digi IX40 offers substantial capabilities for real-time data processing, edge computing and advanced precision while reducing complexity and total cost of ownership. Digi Containers facilitate potent and cost-effective applications, providing additional flexibility and scalability for Industry 4.0, energy, smart cities and other uses.
