

EDGE-TO-CLOUD AND SECURITY SERVICES FOR MODULES WITH INTEGRATED WIRELESS CONNECTIVITY

Integrated edge-to-cloud connectivity

- Industry-leading cloud and edge tools for rapid device deployment, and easier asset management
- Automate mass firmware and software updates to enhance functionality, stay in compliance and scale your deployment
- Access data from edge devices that were previously out of reach
- Integrate device data through open APIs to gain deeper insights and control with third-party applications
- Monitor network, device and asset performance and security with bi-directional communications
- Receive real-time alerts and detailed reports on network health and device conditions

Keep your product secure during the entire product lifecycle

- Make security easier and more accessible by providing a curated security analysis
- Provide visibility on the security status of Digi Embedded Yocto (DEY), making vulnerability reports available
- Identify security issues in Digi ConnectCore® DEY-based customer products
- Monitor and maintain security in devices throughout the entire product lifecycle
- Utilize Digi engineering and consulting services to help resolve security issues
- Take advantage of SBOM analysis and CVE monitoring
- Review binary image scans for additional vulnerability insights
