

FIND THE PERFECT FIT IN FLASH MEMORY, 32-BIT MCU'S AND ANALOG PRODUCTS

Finding the perfect fit for Flash Memory, MCU and Analog in one '25 selection guide

GigaDevice's, represented by Alcom electronics, major product lines include Flash memory, 32-bit general purpose MCUs, intelligent Human-Machine Interface (HMI) sensors, and analog products. GigaDevice offers turnkey solutions for market segments such as automotive, industrial, IoT, network/communications, computing, and consumer

Flash

- SPI NOR Flash
- SPI NAND Flash
- Parallel NAND Flash
- Flash Package Options

GD32 MCU

- GD32 MCU Family
- High-Performance MCU
- Main-Stream MCU
- Entry-Level MCU

- Low-Power Consumption MCU
- Wireless MCU
- Automotive MCU

Analog

- Power Management
- ASIC
- Motor Driver
- Battery Management
- Signal Chain

Sensor

- Capacitive Touchscreen Controller
- Fingerprint Sensor
- Air Pressure Sensor

GigaDevice

Giga Device is a Semiconductor Technology leader
focused on Flash memory, Microcontroller, Sensor and
Analog products.
