

ROAD LIGHTING LED DRIVER

X7S Series Programmable Intelligent LED Driver

Driving safer and smarter urban mobility with adaptive roadway illumination systems. Our intelligent LED drivers enable adaptive brightness control through smooth dimming technology, maintaining stable performance across varied conditions. Built-in surge protection and advanced thermal management ensure continuous operation

Features:

- Input voltage: 90~305Vac
- Isolate constant power Class I & Class II design
- 3-in-1 dimmable: 0-10V/1-10V/PWM (Dim-to-off optional)
- Timers dimming
- Reverse dimming optional
- 3 Timers dimming: Timing; Virtual Midnight; Self-Adaptive
- Output and Dimming Signal Isolating
- Off-line programmable
- Surge protection: DM: 6KV, CM: 10KV (Class I)
- Protections: output SCP / OVP / OTP
- Ingress protection rating: IP67
- 5 years warranty
